SANITATION CONTROL

An Easy-to-use

**Biological Treatment For Bars,
Restaurants, Restrooms, Homes And Offices**

Degrades organic material in cracks, crevices and drain lines.

Disrupts the habitat that flies require for reproduction.

Removes food source for other insects, including cockroaches.

- Compatible with all floor cleaners – no change of soap required
- Once a day treatment – use your regular cleaner during additional cleanings
- One tablet per mop bucket – eliminate waste from over-pours
- **STRONGEST BIOLOGICAL FLOOR CLEANER** on the market

SANITATION CONTROL

Directions for mopping:

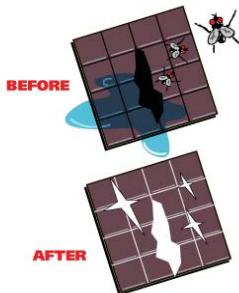

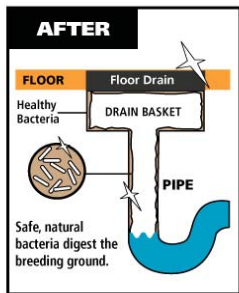

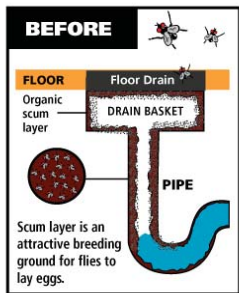

At the end of the day, simply drop one (1) tablet into the mop water prepared with water or with the soap or cleaner of your choice. Allow 2-3 minutes for the effervescent tablet to dissolve. Mop floor normally, focusing on cracks, crevices and spaces under equipment. When mopping is completed, pour the mop water into the open floor drains. If possible, pour equal amounts of mop water into each drain.

Directions by spray bottle:

At the end of the day, fill a spray bottle (1 liter or more) with water. Drop in one tablet and allow to dissolve. Spray directly into each drain (floor, sink and kitchen). Spray remaining amount as a mist over the floor, especially areas with cracks and crevices. Allow floor to dry.

Directions by bucket:

At the end of the day, fill a bucket with water. Drop in one tablet and allow to dissolve. Pour small amounts into each drain (floor, sink and kitchen). Sprinkle remaining amount on the floor and spread with a mop or rag. Allow floor to dry.

- Reduces plumbing costs
- Reduce grease trap maintenance and odor
- Safe for all types of plumbing
- Reduce effluent BOD/COD/TSS
- Easy to use – one tablet per day
- Removes grease buildup on grout

For Best Results:

- Do not mix with extreme pH cleaners
- Mix with biodegradable and environmentally friendly cleaners
- Do not exceed manufacturers application recommendation for bleach and/or harsh cleaners
- Use EmTec SC Sanitation Control at the end of the day.
- DO NOT rinse after or use anti-microbial products immediately after application
